LAND RIDER 403

Battle Tank

Welcome on board of Leopard 2 tank, one of the most popular military machines in the world. You can maneuver the caterpillar driven **Land Rider 403** in all terrains and even shoot on targets.

Technical data:	
Batteries:	7.2 V NiMH
Transmitter Battery:	9V Block Alkaline
Weight:	2240 g
Control distance:	30m
Dimensions:	600 x 245 x 220mm

Not included

ARCTIC HOBBY Charging Station (3 ch)

The leopard design is very true-to-detail and includes machine gun, hatch and many other typical specifications.

The primary armament is a smoothbore gun. Six bullets are included and can be fired off one by one. The tank's smoothbore gun can be moved up and down. While shooting the bullet, Land Rider 403 sounds and moves like real Leopard tank.

The body of the tank can rotate to left and right. Land Rider 403 itself can rotate 360 degree.

The Land Rider 403 is perfect for rough nature terrain and has a maximum climbing angle of 35 degree.
